A Single Intradermal Injection of
Autologous Adipose-Tissue-Derived
Stem Cells Rejuvenates Aged Skin and
Sharpens Double Eyelids
: Journal of Personalized Medicine
J. Pers. Med. 2023, 13, 1162.

analysis, and case 8 showed a slight double eyelid change visually and exhibited increased b/a (Figure 7).

Figure 1. Facial skin manifestation of 5 female cases before and after treatment with intradermal injection of ADSC.

Figure 2. Photographs of 58 year-old lady, case 6, before (a,c,e) and 8 months after ADSC treatment (b,d,f). Reduced wrinkle of forehead 8 months after ADSC injection (b,d) and shallowing of nasolabial grooves was confirmed by comparison of (a) to (b).
